REMARKS

5   Applicant submits herewith Claim Amendments which clarify that the sending
user is associated with a "sending user selectable command" and the receiving
user is associated with a "receiving user selectable command." The notion of
selectable commands is found throughout the application as filed, for example
10   but not by way of limitation, on page 9, line 7, line 10, line 18, page 10, line 3, line
14, page 13 line 12, page 16 line 3 and elsewhere throughout the application.
Accordingly, no new matter is introduced by these claim amendments. Further,
while the Applicant above has referred to various portions of the specifications for
these amendments it should be understood that Applicant is not limiting the
15   scope of the claims of those particular examples provided in the specification and
that any user selectable commands may be provided within the scope of the
invention.

Respectfully submitted,

20
